TROSYD®

IT CREATES AN UNFAVOURABLE ENVIRONMENT FOR THE PROLIFERATION OF FUNGI AND BACTERIA

0.25% ALL-IN-ONE SHAMPOO AND BODY WASH

Tioconazole

SKIN MYCOSES

Skin mycoses are infections caused by microscopic fungi of different nature, which live for a long time and multiply in the dust of floors, carpets and, sometimes, in the ground. Fungi proliferate at a temperature between 24 and 30°C. Contagion can be promoted by environmental factors, such as overcrowded communities and the promiscuous use of sports and school equipment. Fungal infections do not heal on their own and healing often takes a very long time. In most cases, their treatment involves the use of antifungal products for topical use (such as, creams, powders, emulsions, etc.) to be applied daily. In cases of mycosis or skin at risk of mycosis, it is also important to pay attention to products to be used for cleansing. Cleansing must be gentle and, at the same time, allow the removal of dead cells that fungi feed on, thus creating an unfavourable environment for their proliferation. It is also essential not to alter the hydrolipidic film of the skin, which is the natural skin barrier that provides important protection from microorganisms.

TROSYD® CLEANSER

Thanks to its special shampoo-cleansing formula, Trosyd® Cleanser is suitable for daily cleaning of face, body and scalp. Its formula contains active ingredients, such as lactic acid, which help create an unfavourable environment for bacterial and fungal proliferation. The presence of plant extracts also soothes irritation and itching, which can also be caused by the presence of microorganisms.

Thanks to delicate surfactants, it is indicated for the daily cleaning of the skin, while also protecting its protective hydrolipidic film. Suitable for use in swimming pools, sports facilities, saunas and beaches (places where the risk of infection by fungi and bacteria is greater). Fragrance-free. Preservative-free.

HOWTO USE

Apply a small amount of product on the skin and/or on wet hair, massaging until a light foam is obtained. Leave on for a few minutes, then rinse. Well tolerated and also suitable for frequent use.

WARNINGS

Avoid contact with eyes and rinse thoroughly if necessary

INGREDIENTS

Aqua, Glycerin, PEG-7 glyceryl cocoate, Disodium cocoamphodiacetate, Coco-glucoside, Lactic acid, Corn oil, Tioconazole, Bisabolol, PEG-40 Hydrogenated castor oil, PEG-15 cocopolyamine, Propylene glycol, Chamomilla recutita flower extract.
